

BWT-2700

BWT-2700 is a series of products utilizing high purity Monosodium, Disodium and/or Trisodium phosphates. Formulations are to client specifications and can be made with powders or products can be provided as blended liquids in demineralized water.

ADVANTAGES:

BWT-2700 is recommended where a custom fitted phosphate/pH program is desired.

Each product is custom formulated accounting for the clients desired operating practices/phosphate/pH/pressure requirements.

PRINCIPLE USES:

BWT-2700 is suitable for all high purity boiler systems where a high degree of phosphate/pH control is desired.

PROPERTIES:

BWT-2700 is a white powder or a clear liquid.

pH of a 1% solution is 7.0 +/-0.50

Specific Gravity is 1.10 @ 85 degrees F.

Freeze Point – (32) degrees F (5% solution)

TREATMENT LEVEL:

Treatment levels vary according to operating guidelines. Typical treatment levels are 50 to 1000 ppb.

APPLICATION:

BWT-2700 should be fed based on FCT recommendations and using FCT recommended feed/storage equipment.

HANDLING and STORAGE:

BWT-2700 may cause irritation or burns to eyes and skin. Please refer to the MSDS and Product Label Safety Information for complete handling and safety instructions.

SHIPPING:

BWT-2700 is available in 100 pound pails, 55 gallon, 450 pound drums, IBC Totes, bulk quantities and the FCT trademark “Small Bulk” delivery system.

The information herein is intended as a selection guide. Specific applications should be thoroughly reviewed with your FCT representative. Products are warranted to be both the generic material and concentration specified. No application or performance warranty is extended or implied herein.
