

CP-1000

CP-1000 is a concentrated blend of EDTA, HEDP and Polymeric dispersants designed to clean mild steel components in closed cooling water and chilled water systems.

ADVANTAGES:

Excellent calcium carbonate, iron oxide and iron phosphate removal and cleanup.

PRINCIPLE USES:

CP-1000 is recommended for use in the removal of calcium carbonate, iron oxide and iron phosphate scales from closed and chilled water systems.

CP-1000 is designed for use in mild steel systems.

PROPERTIES:

CP-1000 is a clear to amber liquid

pH – 3.5 to 4.6

Specific Gravity – 1.21 @ 60 degrees F

Freeze Point – (30) degrees F

TREATMENT LEVEL:

Typical dosages range from 100 to 500 ppm for **CP-1000** Product is very application specific and should be used in consultation with your **FCT** representative.

APPLICATION:

CP-1000 should be fed based on a detailed cleaning procedure provided by your FCT representative.

HANDLING and STORAGE:

CP-1000 may cause irritation or burns to eyes and skin. Please refer to the MSDS and Product Label Safety Information for complete handling and safety instructions.

SHIPPING:

CP-1000 is available in 55 gallon drums, IBC totes and bulk quantities.

The information herein is intended as a selection guide. Specific applications should be thoroughly reviewed with your FCT representative. Products are warranted to be both the generic material and concentration specified. No application or performance warranty is extended or implied herein.
