

TYPE: LIQUID

FCT Water Treatment

Resin Cleaner

# REZ-Troll

## General Description

REZ-TROLL is a blend of a chelating organic acid, chelating agent, and a surfactant.

## Advantages

- REZ-TROLL is specially formulated to assist in the restoration of fouled ion exchange resin.
- REZ-TROLL solubilizes and disperses metal foulants such as iron, copper, aluminum, and calcium.
- REZ-TROLL restores operating capacity and pressure drop through the ion bed.

## Principle Uses

- REZ-TROLL is designed to aid in cleaning and restoration of fouled ion exchange resin.

## Application

- REZ-TROLL treatment levels depend on many factors such as the degree of fouling of the resin and the condition of the resin.
- Typical feedrate levels of REZ-TROLL are 0.3 to 0.6 gallons per 10 cubic feet of resin
- REZ-TROLL should always be used and applied in accordance with the control procedures established by FCT for a specific application.

## Handling & Storage

- As with all chemicals, instructions on the product label and Material Safety Data Sheets should be followed for proper handling procedures. REZ-TROLL is an acidic material that may cause burns if allowed to contact skin or clothing. When handling the product, personnel must wear rubber gloves and eye protection as a minimum.

## Physical Properties

Physical Properties	Values
Appearance	Colorless to white liquid with no odor
Specific Gravity	1.19
pH at 25°C	1.8
Freeze Point	-80°C
Boiling Point	Not established
Solubility	Miscible

## Standard Product Availability

Unit of Measure	Availability
5 Gallon Pails	50 lb
55 Gallon Drums	550 lb Non-returnable
Bulk	Intermediate bulk containers
